

Genetic Engineering and Biotechnology News: Navigating the Complexities of AAV Scale-Up and Manufacturing

December 10, 2020

Tenaya's senior vice president of manufacturing, Kee-Hong Kim, Ph.D., spoke with John Sterling, editor of Genetic Engineering & Biotechnology News in an executive roundtable interview to discuss the challenges and complexities involved with AAV manufacturing for gene therapy. Kee shared his perspective on the resources, tools and expertise needed to scale up production, as well as how Tenaya is innovating and strategizing to overcome these challenges.
